

GANESH KUMAR S

MECHATRONICS ENGINEER

PH: +91 9363195116 | ganu09092003@gmail.com | Hosur, Tamil Nadu

PROFILE

A Mechatronics Engineering graduate with a strong foundation in problem-solving and system design, now transitioned into a Full Stack MERN Developer. Experienced in building full-stack web applications using MongoDB, Express.js, React, and Node.js, with hands-on experience in developing RESTful APIs and integrating frontend and backend systems. Passionate about creating scalable web solutions and continuously upgrading skills in modern web technologies.

EDUCATION

SRI VIJAY VIDYALAYA **Hosur**

SSLC - 94 % 2018 - 2019

HSC - 93 % 2020 - 2021

SRI KRISHNA COLLEGE OF ENGINEERING AND TECHNOLOGY, **Coimbatore**

CGPA - 8.13 2021 - 2025

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, JavaScript, TypeScript, React
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, SQL
- **Programming Languages:** Java, JavaScript
- **Tools:** Git, GitHub, Postman, VS Code

INTERNSHIPS

VIYOMA MANUFACTURING PVT. LTD. **Hosur, 2023**

Gained hands-on experience operating CNC machines with a strong focus on precision-driven manufacturing. Developed skills in CNC programming, machine setup, and process optimization to ensure efficient operations and high-quality production standards.

NOVITECH R&D PVT. LTD. **Coimbatore, 2025**

Worked as a Data Analytics Intern, analyzing and visualizing datasets using Python, SQL, and Power BI to derive actionable insights. Created dashboards, performed data cleaning, and generated performance reports to support business decision-making. Additionally, integrated advanced sensors and camera systems to detect and recognize obstacles, enabling real-time audio or haptic feedback for improved navigation and safety. Developed image processing capabilities for object detection, path recognition, and enhanced situational awareness.

PROJECTS

SMART BLIND STICK

Developed an assistive navigation system utilizing sensors and vision-based technology to detect obstacles and enhance user safety. The system provides real-time feedback to support improved navigation and accessibility for visually impaired users.

BASIC CALCULATOR TOOL

Designed and developed an interactive calculator using HTML, CSS, and JavaScript to automate complex formula-based computations. Implemented dynamic UI updates, robust input validation, and a user-friendly interface to improve accuracy and usability. Optimized the codebase using clean architecture and reusable JavaScript functions for better performance and maintainability.

WEATHER APP USING REACT

Built a responsive Weather Application using React with real-time API integration to fetch and display current weather data. Implemented location-based search, dynamic UI updates, and efficient state management to deliver accurate temperature, humidity, and forecast information through a smooth and intuitive user experience.

TODO APPLICATION(MERN STACK)

Developed a full-stack Todo application using MongoDB, Express.js, React, and Node.js. Implemented RESTful APIs for creating, updating, deleting, and retrieving tasks. Integrated frontend with backend using API calls and handled JSON-based data exchange. Ensured clean architecture with modular controllers, routes, and models.

VOLUNTEER EXPERIENCE

KRIZEN EVENT

Coimbatore, 2023

Volunteered in organizing a Line Following Robot competition, contributing to event coordination, smooth execution, and effective participant engagement.
